KOTHA SRI VAIDHIKA

Software Engineer — Full Stack Developer
Hyderabad | +91 8074544037 | srivaidhikakotha@gmail.com
LinkedIn: Kotha Sri Vaidhika | GitHub: srivaidhika | Portfolio: SriVaidhika

PROFESSIONAL SUMMARY

Full-stack developer fresher with hands-on experience building REST APIs with Java, Spring Boot, and PostgreSQL, and developing front-ends with React.js and Flutter. Currently a Developer Intern at Cyberlearnix Pvt. Ltd., where I completed the backend for a movie booking application and am now building the customer-facing mobile app end to end. Comfortable across the stack — API design, database modelling, Postman testing, and Git-based collaboration within SDLC workflows — and currently building working knowledge of Angular and core UI/UX principles to round out front-end versatility for full-stack roles.

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML) CGPA: 8.25/10 | Exp. 2027
Vignan's Institute of Management and Technology for Women (JNTUH)

Intermediate 86% | May 2023
SR Junior College

Secondary School 100% | May 2021
Nirmala Hrudaya High School

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, Dart, C

Frontend: React.js, Flutter, HTML, CSS, Angular (working knowledge), UI/UX design fundamentals

Backend: Spring Boot, REST APIs, JPA, Hibernate, CRUD

Database: PostgreSQL, MySQL, SQLite

Cloud & Tools: AWS fundamentals, Git/GitHub, Postman, IntelliJ IDEA, Android Studio, pgAdmin, SDLC

EXPERIENCE

Developer Intern — Cyberlearnix Pvt. Ltd. May 2026 – Present

- Built the backend for a Movie Booking System using Spring Boot, PostgreSQL, and RESTful APIs covering full CRUD operations.
- Tested and validated APIs with Postman; debugged issues to ensure application reliability.
- Currently building the Customer Super App end to end — developing the Flutter (Dart) frontend and integrating it with the Spring Boot backend for a full-stack mobile application.
- Collaborating with the team via Git/GitHub, following Software Development Life Cycle (SDLC) best practices.

PROJECTS

Customer Super App Ongoing

- Full-stack cross-platform app — Flutter (Dart) frontend, Spring Boot + PostgreSQL backend.
- Implementing user authentication, product browsing/search, cart, order management, and profile management.
- Integrating the Flutter frontend with RESTful APIs following responsive UI design and clean architecture practices.

Movie Booking System May 2026 – Jun 2026

- Spring Boot + PostgreSQL backend with RESTful, full-CRUD APIs for movies and bookings; JPA/Hibernate for persistence.
- Tested and validated backend APIs using Postman.

AI-Based Smart Helmet System for Rider Safety Jan 2026 – Apr 2026

- IoT + Arduino + ML system with IR and alcohol sensors to enforce helmet usage and detect impaired riding.
- Built a Python ML model for accident-risk prediction and a real-time monitoring/emergency alert system.

Real/Fake News Detection Web Application Aug 2025 – Sep 2025

- End-to-end NLP web app classifying news as real or fake with a Multinomial Naive Bayes model; Flask + SQLite for prediction history.
- Built an interactive Flask web interface with SQLite integration for prediction history and user activity tracking.

Traditional Culture of India Web Application Feb 2025 – Jun 2025

- Interactive, responsive platform showcasing India's traditional sweets, textiles, and fashion with structured navigation and multimedia.
